Education

- **Tbilisi State University** 2019–2021
Master's degree in Information Technology, GPA 3.6
- **Tbilisi State University** 2015–2019
Bachelor's degree in Computer Science

Skills

- HTML, CSS (SCSS, LESS), JavaScript, TypeScript
- React, Next.js, Single-spa (micro-frontends)
- Jest, Vitest, Git, REST, responsive UI, performance optimization
- TailwindCSS, SOLID and DRY design patterns

Work Experience

- **BasisBank** – Senior Front-end Developer 2024 – now
Developed an online banking platform serving legal entities and private individuals. Features included secure account management, fund transfers, bill payments, and transaction tracking, providing a seamless and user-friendly experience. Used TypeScript, Next.js, TailwindCSS, following SOLID and DRY design principles.
- **Staffbase** – Senior Front-end Developer 05/2025 – 12/2025
Developed the frontend for an email migration service enabling users to move emails, templates, and drafts while configuring sending domains and senders. Implemented onboarding, authentication, migration flows, optimized large-data performance, and delivered production-ready UI.
- **Sweet Making Science** – Senior Front-end Developer 2021 – 2024
Contributed to web products including micro-frontend restructuring of the **Philip Morris** enterprise admin platform, an online education portal, and the **Choice TV** video platform supporting viewing, purchasing, and playlist management.
- **Aptos** – Front-end Developer 2020 – 2021
Led redesign of the dashboard improving usability, navigation, and accessibility.
- **Translate.ge** – Full-stack Developer 2019 – 2020
Built platform for file uploads and secure payments for translation services, implemented full stack from UI to backend logic.
